### in the cellar

The grapes were destemmed, crushed and the juice left on the skins without active maceration for 5 hours. Yeast (Vason ERSA 1376) was inoculated after 48 hours of juice settlement then fermented for 17 days at an average temperature of 14° C until dry.

The wine is unwooded, made in a reductive style, remaining in tank until bottling. The wine was protein stabilised using bentonite and tartrate stabilisation was undertaken prior to bottling.

The wine was fined in tank using gelatine and careful "racking". No filtering of the wine was undertaken except at bottling when a split 70/110 AF sterile filtration was used.
