about the harvest

13th February 2020.

in the cellar

The grapes were destemmed, crushed and the juice left on the skins without active maceration for 1 hours. Yeast (Laffort Actiflore Rosé) was inoculated after 24 hours of juice settlement then fermented on the Viognier lees for 8 days at an average temperature of 17 degrees C until dry.

The wine is unwooded, made in a reductive style, remaining in tank until bottling. The wine was protein stabilised using bentonite and tartrate stabilisation was undertaken prior to bottling.

No filtering of the wine was undertaken except at bottling when a split 70/110 AF sterile filtration was used.
